

Energizer UK Pension Plan

Engagement Policy Implementation Statement for the year ending 5 April 2021

Introduction

The Trustee of the Energizer UK Pension Plan (the 'Plan') has a fiduciary duty to consider their approach to the stewardship of the investments, to maximise financial returns for the benefit of members and beneficiaries over the long term. The Trustee can promote an investment's long-term success through monitoring, engagement and/or voting, either directly or through their investment managers.

This statement sets out how, and the extent to which, in the opinion of the Trustee, the policies set out in the Statement of Investment Principles on the exercise of rights (including voting rights) attaching to the investments, and engagement activities have been followed during the year ending 5 April 2021. This statement also describes the voting behaviour by, or on behalf of, the Trustee.

The Trustee, in conjunction with their investment consultant, appoints their investment managers and choose the specific pooled funds to use in order to meet specific policies. They expect that their investment managers make decisions based on their assessment about the financial performance of underlying investments (including environmental, social and governance (ESG) factors, and that they engage with issuers of debt or equity to improve their performance (and thereby the Plan's performance) over an appropriate time horizon. The Trustee has decided not to take non-financial matters into account when considering its policy objectives.

During the year, the Trustee received training from their investment consultant on ESG issues, including stewardship and engagement.

Stewardship - monitoring and engagement

The Trustee recognises that investment managers' ability to influence the companies in which they invest will depend on the nature of the investment.

The Trustee's policy is to delegate responsibility for the exercising of rights (including voting rights) attaching to investments to the investment managers and to encourage the managers to exercise those rights. The investment managers are expected to provide regular reports for the Trustee detailing their voting activity.

The Trustee's policy is to delegate responsibility for engaging and monitoring investee companies to the investment managers and they expect the investment managers to use their discretion to maximise financial returns for members and others over the long term. As all of the investments are held in pooled vehicles, the Trustee does not envisage being directly involved with peer to peer engagement in investee companies.

Investment manager engagement policies

The Plan's investment managers are expected to have developed and publicly disclosed an engagement policy. This policy, amongst other things, provides the Trustee with information on how the investment managers engage in dialogue with the companies it invests in and how it exercises voting rights. It also provides details on the investment approach taken by the investment manager when considering relevant factors of the investee companies, such as strategy, financial and non-financial performance and risk, and applicable social, environmental and corporate governance aspects.

Links to each investment manager's engagement policy or suitable alternative is provided in the Appendix. These policies are publicly available on each investment manager's websites.

Exercising rights and responsibilities

The Trustee recognises that different investment managers should not be expected to exercise stewardship in an identical way, or to the same intensity.

The investment managers are expected to disclose annually a general description of their voting behaviour, an explanation of the most significant votes cast and report on the use of proxy voting advisers. BlackRock may use proxy advisers for the purposes of providing research, advice or voting recommendations that relate to the exercise of voting rights.

The Trustee does not carry out a detailed review of the votes cast by or on behalf of their investment managers but rely on the requirement for their investment managers to provide a high-level analysis of their voting behaviour.

The Trustee considers the proportion of votes cast, and the proportion of votes against management to be an important (but not the only) consideration of investor behaviour.

The latest available information provided by the investment managers are as follows:

Voting behaviour			
Investment manager	Period	Proportion of votes cast	Proportion of votes against management
BlackRock Investment Management	12 months to 31 Dec 2020	97.6%	9.2%

The voting data is not fund-specific; it relates to BlackRock as a whole and in respect of the equity investments only.

Trustee's assessment

The Trustee has considered the environmental, social and governance rating for each fund/investment manager provided by the investment consultant, which includes consideration of voting and/or engagement activities. This also includes those funds that do not hold listed equities.

The Trustee has reviewed the investment managers' policies relating to engagement and voting and how they have been implemented and have found them to be acceptable at the current time.

The Trustee recognises that engagement and voting policies, practices and reporting, will continue to evolve over time and are supportive of their investment managers being signatories to the United Nations' Principles for Responsible Investment and the Financial Reporting Council's UK Stewardship Code 2020.

Appendix
